General *(continued)***Objective**

Statutory objective of the organisation.
What does the organisation seek to achieve?

The objective of the Foundation is to openly share data, knowledge and stories about renewable energy innovation across land, marine and urban pillars.

Outline of the policy plan

Please answer the questions below or provide an URL to the policy plan after the last question about the policy plan.

The online policy plan should at least provide answers to the questions about the policy plan asked here.

What are the institution's activities?
When are which activities to be carried out? And how do the activities contribute to achieving the institution's objective?

'Foundation Zero accelerates the adoption of energy innovations by leveraging technology, open-knowledge and collaboration. It focuses on energy systems across marine, land and urban domains. The Foundation's activities include: supporting the development of science-based, scalable energy innovations, enabling adoption and replication through open-knowledge and collaboration, and generating and sharing insights, data and practices applicable across organizations and sectors.

How does the organisation generate income or revenue?

The only sources of income for the Foundation is donations from the board's network.

1	General (continued)	
How and for what purposes are the revenues spent? <i>If your organisation holds capital, please fill in here where and how this capital is held (e.g. savings account, investments, etc.)</i>	In principle, all received funding and donations are directly used to promote and support the objectives of the Foundation. However, reservations can be made to support long-term projects which need financial support over several years, as well as reservations to ensure the Foundation's long-term sustainability. The Foundation will not retain more assets than, in the opinion of the Board, is reasonably necessary to guarantee the continuity of Stichting Zero's work in pursuit of its objective as referred to above.
